

# Guidelines Github

Let's suppose you have your repository:

The screenshot shows the GitHub repository page for 'affromero / IBIO4680'. At the top, there are buttons for 'Unwatch' (2), 'Star' (0), and 'Fork' (18). Below these are tabs for 'Code', 'Issues' (0), 'Pull requests' (0), 'Projects' (0), 'Wiki', 'Insights', and 'Settings'. A message states 'No description, website, or topics provided.' with an 'Edit' button. Below this is a section for repository statistics: '19 commits', '1 branch', '0 releases', and '1 contributor'. There are buttons for 'Branch: master', 'New pull request', 'Create new file', 'Upload files', 'Find file', and 'Clone or download'. The main content area shows a commit history table with columns for file name, commit message, and time ago.

File	Commit Message	Time Ago
01-Linux	update homework	9 days ago
02-Git	update readme	2 days ago
.gitignore	update pptx	2 days ago
README.md	readme	10 days ago

You and your partner need to decide whose repository is going to be the 'main' repository i.e., both of you will contribute to only one repository. \*\*No personal password is provided if you are worried\*\*.

For this purpose, check the following pictures:

1.

This screenshot is identical to the one above but includes red annotations. A red box highlights the 'Settings' tab in the top navigation bar, with a mouse cursor pointing at it. Another red box highlights the '1 contributor' text in the repository statistics section.
