Guidelines Github

Let's suppose you have your repository:

You and your partner need to decide whose repository is going to be the 'main' repository i.e., both of you will contribute to only one repository. **No personal password is provided if you are worried**.

For this purpose, check the following pictures:
1.

4.

affromero / **IBIO4680**

affromero invited you to collaborate

Accept invitation   Decline

Is this user sending spam or malicious content? You can block @affromero.

Now you can push to your partner repository.

Remeber 'git pull' before doing 'git push' in case your partner have modified the content of the repository.

Send me the 'main' repository link.
